

FSMA Hazard Analysis for Feed Mills

Wayne Nighorn ^{1/}

The Food Safety Modernization Act is something that affects nearly all animal food production facilities. The deadline for CGMP compliance for small and large companies has come and gone.

For small facilities, September of 2018 is the compliance deadline for the preventative control and hazard analysis part of the Food Safety Modernization Act. We will be talking about how to identify hazards at your facility, along with how to use your SOP's and policies to create a prerequisite program to handle those hazards. We will also be discussing when we may have to use preventative controls and what that looks like.
